**STATEMENT OF WORK**  
**Arthritis Research Centre Society of Canada– Services of Dr. John Esdaile**

**1. Project Description:**

The Organization of Teratology Information Services (OTIS) Autoimmune Diseases in Pregnancy project is an umbrella designation sponsored studies each of which involves following currently pregnant women who have been exposed to medications and other agents of interest during or just prior to pregnancy. The purposes of this project is to evaluate the possible effect these medications, as well as the underlying conditions, may have on pregnancy outcome including the child's development up to 5 years of age. Funds are being provided to the Arthritis Research Centre Society of Canada for the services of Dr. John Esdaile, MD to support study related scientific user advisory board activities. The protocol for this study is authored by Dr. Kenneth Lyons Jones and Dr. Christina Chambers with the current IRB approval for this project #141162. 4/16/2024.

For the purposes of this agreement the prime sponsor is UCB Biosciences, Inc.

UCSD No 309953-00001

Principal Investigator: Christina Chambers, PhD, MPH

Project Title: Bimekizumab Pregnancy Exposure and Outcomes Registry – an OTIS Autoimmune Diseases in Pregnancy Project

Award dates: 4/2/2022-4/1/2034

Funding Source: 7028340

**2. Description of Services**

The Arthritis Research Centre Society of Canada will provide the professional services of Dr. John Esdaile, MD. Dr. Esdaile is a member of multiple sub-studies under the OTIS Autoimmune Diseases in Pregnancy project umbrella. The annual activities for these sub-studies can include an annual meeting, multiple conference calls, mandatory report preparation for submission to sponsors, consultation on issues of adverse events and consultation on how to promote program services and recruit study participant.

As a member of the scientific advisory board, Dr. Esdaile will provide the following services:

- Review and commentary of annual and other study related reports
- Expertise on issues of adverse events occurring in pregnancy registry subjects exposed to the drug of interest and present his evaluation of the adequacy of the current study protocol in terms of scientific rigor and the sponsor's objective
- Consult with UCSD Program on how to promote program services and recruit study participants

**3. UCSD Project Manager & Contact Information**

Christina Chambers, PhD, MPH, ph:858.246.1704, email: [chchambers@ucsd.edu](mailto:chchambers@ucsd.edu)

**4. Recipient Project Manager & Contact Information**

Patricia Webb, 604-207-4024, email: [pwebb@arthritisresearch.ca](mailto:pwebb@arthritisresearch.ca)

**5. Recipient Contract & Fiscal Contact**

Patricia Webb  
Executive Assistant
